Any other suggestion for improvement:

- Internal exam should be of 40 marks instead of 80 marks

- Tell students 6 month training in hospital and 6 month training in compny complsary so as a pharmacist in medical store they are easily know all the medicine and uses.
- Narrow downing gap between industry and academy.
- In course cover some topic like usfda, mhra, tga in details which are more important in pharma industry.
- The connection that faculty makes with student is amazing and that is what makes student to take interest in particular subject. That connection should never be compromised.
- It has been a great experience of being at RPCP, Personally I have visited many colleges and met students from different universities. Our college is better at many terms
